## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not teach nor suggest, in the claimed combination, an electromagnetic valve with a coil defining a longitudinal axis and being tightly connected to an iron core; an armature plate movably mounted for movement along the longitudinal axis relative to said iron core having a side facing toward said coil; a first flow channel opening out at a peripheral region of the armature plate at the side facing toward said coil; a second flow channel opening out at said armature plate; a first armature position in which no current flows through the coil causing the first and second flow channels communicate with each other and a second armature position in which there is a current flow through said coil causing the first and second flow channels to be fluidly separated from each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

Applicant's arguments, filed 06/05/2006, with respect to claims 1-4 and 12-14 have been fully considered and are persuasive. The rejection of claims 1-4 and 12-14 has been withdrawn.
